Seniors by Seniors**

Lots of Interesting Daytime Courses to take
Meet new people, Make new friends

FALL 2008 THE COLLEGE IS NOW OFFERING:

Beginner's Courses in:

Mandarin, German, and Italian.

Want to learn how to converse better with neighbours or friends who speak the above and other languages? This is your opportunity to learn those words and phrases which will help to build friendships and deepen relationships.

Advanced Digital Photography: A new teacher has been found!

You know the basics but would now like to know how to really edit and improve your photos using readily available software. This hands-on course allows you to explore and expand your knowledge in producing great pictures that you and your friends will treasure.

FaceBook and YouTube

You've heard about them, but always wondered what they were and if you would enjoy knowing and using these computer applications. This course will provide "hands-on" learning with such subjects as joining a network, chatting on-line, viewing and posting photos and videos, plus many other related and helpful topics.

Technology for Seniors

This course has been updated and expanded to include technology topics relating to communications, medical, and entertainment/recreational technologies. A special field trip to a firm supplying medical and other assistive equipment for seniors is included. Learn about MP3, blood pressure monitors, 911 response systems, GPS, and many more helpful technologies.

Recorders

Enjoy music or have always wanted to play an instrument? Here's a wonderful opportunity to learn and play a beautiful and readily available economical instrument that you will enjoy for the rest of your life.
