

BENEFITS OF LIFELONG LEARNING

Learning and upgrading your knowledge or skills throughout your lifetime can happen in many different ways. One of those are friendly, studio-room-based courses.

Continuous learning is a great way to remain active, exercise your body, and stimulate your mind. It not only improves your physical health, but also keeps your brain alert and memory sharp.

You may notice that lifelong learners are usually open-minded, curious, happier, and more socially and professionally engaged than others who may not pursue active learning opportunities.

As physical exercise contributes to physical health, learning contributes to mental and emotional wellness.

- It brings a sense of purpose and achievement.
- It brings people together and allows for social connections and friendships to form.
- It can keep our memories sharp and our brains alert.

Learn for Fun, Teach for Pleasure!

Our Instructors!

CCCR has been so fortunate to have experienced the generosity of a multitude of volunteer teachers over the years. From Ukelele, to Drawing and from Calligraphy to Desktop Basics we've never had a shortage of retired and kind human beings that have come forward to donate their time to our college.

Donations welcome. Tax receipt available.

Alan Emmott Centre

Community College for the Retired
6650 Southoaks Crescent, Burnaby
